Britta Marakatt-Labba Exhibition - By Tracy Roberts

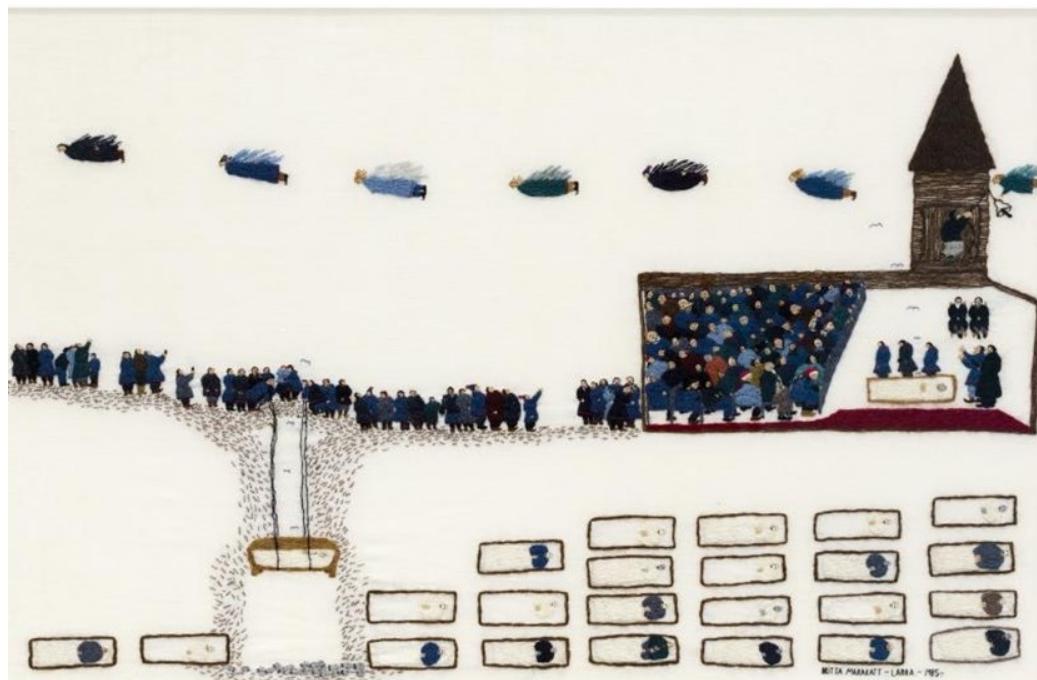

I went to Birmingham with Jess from about face to see an exhibition by Britta Marakatt-Labba.

For almost 40 years, she has made Sami history, everyday life and mythology come to life by story telling in stitch.

The **Sámi** are a group of **indigenous people** that come from the region of **Sápmi**, which stretches across the northern parts of **Norway, Sweden, Finland** and the **Kola peninsula in Russia**.

All the pictures were embroidered and they were amazing and a lot of work went into each picture.

I loved all of the pictures and each one told a story but my favourite one was 'this is tomorrow'.

Calendar Girls — By Tracy Roberts

I interviewed Jenni Axtell and Nigel Holloway who are the on the production team for Calendar girls and this is their point of view of the show.

Interview with Musical Director for Calendar Girls.

How do messages travel in the human body - By L Perkins

The nervous system is made up of the brain, the spinal cord, and a large network of nerves that covers all parts of the body.

Together the nervous system helps different parts of our body communicate and allows our brain to control what is going on.

Without the nervous system our brain wouldn't know anything that was going on in the outside world and wouldn't be able to control our body.

The brain and the spinal cord make up what is called the central nervous system. The rest of the nerves together are called the peripheral nervous system.

Nerves

Nerves are sort of like wires that carry communication signals or impulses around the body.

Within the peripheral nervous system there are two main sets of nerves: the autonomic nervous system and the somatic nervous system.

- Autonomic nervous system - This set of nerves works automatically. We don't have to think about them, the brain does it all for us e.g. heartbeat, digestive system.
- Somatic nervous system - These are the nerves that we actively control, like jumping with our legs or moving our arms.

The Neuron

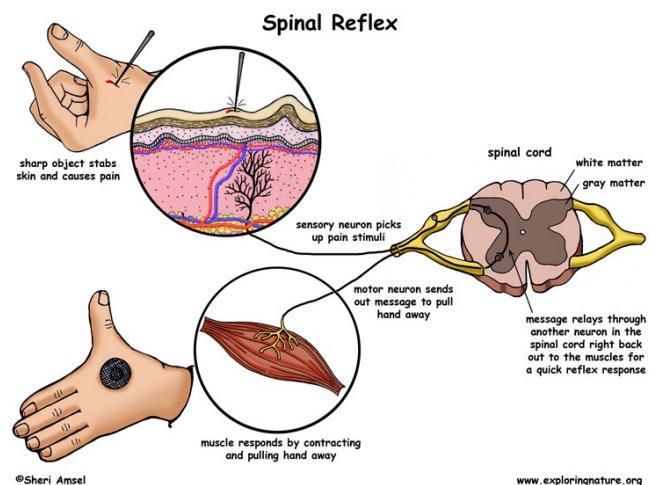

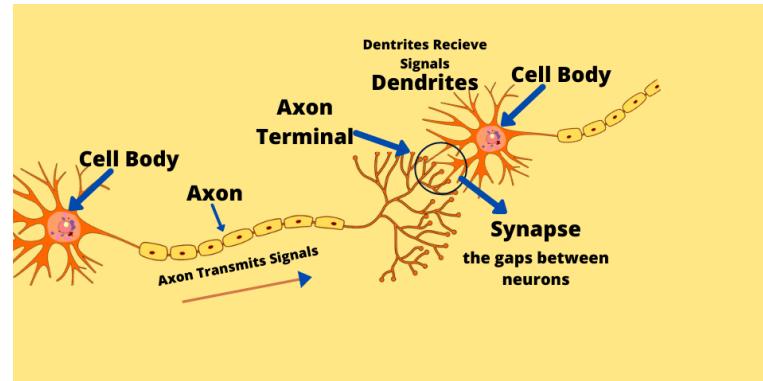

Each nerve is made up of many cells called neurons. To learn more about neurons, let's take the motor neuron for example. Each motor neuron has three important parts: the cell body, dendrites, and the axon. Dendrites are branches off the main cell body. They talk to dendrites from the cell next to them over something called a synapse. Axons connect to the muscles and tell them what to do.

Reflex

Our bodies are super smart.

Sometimes we need to move so fast that our brains don't have time to think. So, our body just bypasses the brain. This happens when we touch something hot. Our hand moves before the brain tells it to.

The brain eventually finds out what is going on, but our body has done the smart thing and moved first.

My favourite ride! - By Laura Joliffe.

I went to the May fair every night when it was in Hereford.

I went on The Sizzler three times!

It is a fun fair classic that first started to appear in the fair in the 1960's.

It goes really fast and spins you around. I loved it and did not feel scared at all. It is the only ride I went on at the fair.

New Life and Soul Kitchen café .

By Laura Joliffe

I went to the new Life and Soul Kitchen Cafe in Maylords Shopping Centre with Lauren last week. I went in there for food at lunchtime. It was very nice. I had a cheese baguette and Lauren had cheese and onion baguette.

The food is a good mix of breakfast treats, baguettes & paninis, baked potatoes, delicious cakes, snacks, and hot and cold drinks.

It is a nice welcoming relaxed atmosphere.

Three elms trading café is now open Tuesday - Saturday 9-5 and Maylord is Monday-Saturday 9-5 Sunday 10.30-4

Bargains galore! - By Laura Joliffe

I

went to Madley car boot sale on Sunday afternoon. It is a good place for bargains.

I paid £5.00 for a pair of white fur lined boots. They can be worn with cuff up or down.

Previously I have bought other great bargains e.g.:

Leopard skin coat, Black Boots ,
Jeans , Jacket and Shirt.

You can also get other great stuff like phone chargers and DVD's.

Why not visit a car boot sale? It is cheap and good for the environment to recycle!

A man asked a widow if he could say a word at her husband's funeral. She said "Certainly."

He stood up and said "Plethora" , and the woman said "Thanks, that means a lot."

And another man stood up and said, "Bargain" and the woman said, "Thanks, that means a great deal."

Yet another stood up and said, "Earth" and the woman said, "Thanks, that means the world."

Yet another stood up and said, "Infinity" and the woman said, "Thanks, that means more than you can imagine."

Yet another stood up and said, "Being Alive" and the woman said, "Thanks, my husband would have loved that."

Another person simply held up a sprig of spearmint, and the widow said, "Thanks, that's a lovely scent of mint."
